Do not add a new row below the last data row.

The final data row is not underlined because a sort could move the underline to an unexpected location.  
Also, the Professor Count would become corrupted. See Formulas->Name Manager->StudyAllProffs.

**945 courses are presently listed, and I will no longer be updating or revising the list.**

Over time, maintaining the Courses list becomes ever-more complex and time-consuming. I have more important things to do. Ultimately, only the Teaching Company is able to produce a unified tool for a systematic approach to their courses.

**General Notes:**

This workbook is hosted on the Great Courses page of OrrinSmith.org. Consult the clickable links.  
The workbook's spreadsheets are preset for printing on legal size paper in landscape mode.  
The Courses list host no variously categorized course duplications: one course, one row.  
The Courses list has been derived exclusively from TheGreatCourses.com website.

**Skills:**

To modify this spreadsheet, some skills are required. I will not provide any support for using this workbook.  
Your workbook/spreadsheet configuration settings and usage methods may differ from mine.  
Normally, by your careful work, you should not have to deal with any of the following complexities.  
Complexities for the Courses spreadsheet reside:  
    Within Formulas->Name Manager.  
    Within Home->Conditional Formatting. (Worksheet copy/paste is a big trickster.)  
    Within the statistics table formulas at the bottom of the spreadsheet.

**To make the wide Courses spreadsheet more readable:**

Double-click any main menu tab to lock or unlock the ribbon.  
To condense the whole spreadsheet, go to View->Zoom and set a percentage size, such as 75%.  
To filter rows, go to Data->Filter.  
To hide one or more columns, right-click the column header, then hide.  
To unhide one or more columns, right-click the surrounding column headers, then unhide.

**Mark or unmark a course for consideration:**

To mark a course for consideration, enter an "x" in a completion date cell.  
The conditional formatting rule will automatically color-fill the course's data cells.  
To unmark a course, delete the "x". The color-fill will revert to normal.

**Mark a course as completed:**

Enter a date in a completion date cell.  
The course statistics tables will be automatically updated.

**Insert and fill a new row:**

Place your cursor inside a course data cell.  
Separately press and release the keys: Alt, I, and R.  
Drag the Row and Hours formulas down from their above cells.  
Enter new data into the empty data cells. Sort if needed.

**Sort:**

My preferred sort order is preset to:  
    Category1, Category2, Category3, From (largest to smallest), To (smallest to largest), Course Title.  
To modify the sort order:  
    Place your cursor inside a course data cell.  
    Go to Data->Sort.  
    Check the box: "My data has headers".  
    Set your desired sort values.

**Find a specific course on The Teaching Company's websites:**

The simplest method: enter the course id into their search box.  
In the Courses worksheet, the course id is displayed just to the left of the course title.

**Identify new releases (if not already included in the Courses worksheet):**

Go to the workbook's Revisions tab, and identify latest included courses.  
Go to TheGreatCourses.com. (See clickable links.)  
Go to Browse->New Releases->Sort By Newest.  
Find and check the "Individual Courses" box.  
Page down or use your browser's find function (F3) to find those latest Revisions tab included courses.  
Typically, the above will be newer releases, but occasionally a few below might also be.
